

Bayside Cemetery

This project has been a labor of love since I started it in 2008. I was first asked to do a new listing of Bayside by John Austin when he was doing his Civil War Soldiers Project because the list we had was done in 1969 and there were many people missing and there were quite a few errors. I was pleased to be asked because Bayside Cemetery is one of my favorite places in Potsdam.

I added extra information that I found through Obituaries I found on the sites Northern New York Historic Newspapers and Old Fulton NY Postcards. I also used Ancestry.com, the records we have in the archives and the interment records at the Potsdam Public Museum.

I tried my best to copy right from the headstones but some of them were hard to read. There are two reasons for this: erosion of stones and need cleaning.

The sections are not labeled in the map that people can pick up and also the sections themselves do not have any markers telling what sections they are. The only map that is labeled is in the cemetery office.

I do not have the plot information for all the graves because I have not been able to gain access to the 1865-1877 and 1988-now records.

Bayside Cemetery Info

Bayside Cemetery was established in 1865. It is an example of the Rural Cemetery movement. Interment began in 1867. The graves with death dates before 1867 were moved from abandoned cemeteries in town.

Old listings

There are two other listings done of Bayside that I know of. The first one was done in 1969 and copies can be found at the County Historical Association and at the Potsdam Public Museum.

The Potsdam Public Museum also has a listing done in the 2000's. Both listings are by section and do not include Sections A and B.

The Potsdam Public Museum has a copy of the original interment records from 1877-1988. Some of the information is cut off because of the way it was copied. There is other information on the original records which I did not include in my notes like permit date, lot book page, and grave fee (a lot of them do not include it in the records).

A Key to the Bayside Cemetery Listing

1. If the person's name is in Italics it means there is a question if they are buried at Bayside.
2. If the Parents' and Spouse's name is bolded it means they are also/or going to be buried in Bayside
3. If there is a question on one of the numbers in a date I will put one of the numbers in ().
4. Most of the birth years are approximations based on their age of death
5. For the gravestones with just the first initials and I know the first name I put the rest of the letters from the first name in (). An example is M.A. Caswell, his first name is Melvin but his gravestone just says M.A. so I put down M(elvin) A.
6. If the name is in red it means their obituary or the original records that are at the Potsdam Museum says they are buried in Bayside or they are on the 1969 listing but I cannot find a stone for them.
7. If the name is in purple it means they are buried in another cemetery but they have a stone or their name is on a stone in Bayside. To see where they are buried check the Cenotaphs list.
8. If their name is in orange it means they are buried in Potters Field

How this book is organized

This book is divided up into nine different sections. The first section is of course the grave listings. The second section I am calling Cenotaphs dealing with people whose names are on stones in the cemetery but are buried somewhere else. The third section is notes about some of the people with other information I found. The next six sections are list of veterans. I have a list for the Revolution and War of 1812, Civil War, World War One, World War 2, Korea and Vietnam

Please let us know if there is any incorrect information.

Remember some of the people who have stones in Bayside are still are alive so please do not use their information for anything other than genealogy.
